

Guideline for activities to be covered during Health Mela (2009-10)

As in the previous financial year, Health Melas for the current year will be organised in 3(three) different locations, preferably in rural and far-off areas. IEC activities during the Health Melas should primarily focus on Family Planning, Maternal and Child Health, Malaria and Influenza H1N1 among others. Opening ceremonies of each Health Mela will be kept simple and cultural activities may be reduced to a minimum. Details of activities are mentioned below; however activities such as impregnation of bed-nets should be reduced to a minimum.
